Foreword

Our country's future lies in the education of our children. The Government of Sierra Leone is committed to doing whatever it takes to secure this future.

As Minister of Education, Science and Technology since 2007, I have worked every day to improve our country's education. We have faced challenges, not least the Ebola epidemic which as we all know hit our sector hard. The Government's response to this crisis – led by our President – showed first-hand how we acted decisively in the face of those challenges, to make things better than they were in the first place.

One great success in our response was the publication of the Accelerated Teaching Syllabi in August 2015. This gave teachers the tools they needed to make up for lost time whilst ensuring pupils received an adequate level of knowledge across each part of the curriculum. The Accelerated Teaching syllabi also provided the pedagogical resource and impetus for the successful national radio and TV teaching programs during the Ebola epidemic.

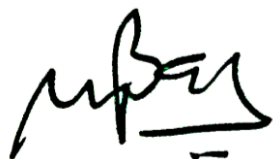

It is now time to build on this success. I am pleased to issue new lesson plans across all primary and JSS school grades in Language Arts and Mathematics. These plans give teachers the support they need to cover each element of the national curriculum. In total, we are producing 2,700 lesson plans – one for each lesson, in each term, in each year for each class. This is a remarkable achievement in a matter of months.

These plans have been written by experienced Sierra Leonean educators together with international experts. They have been reviewed by officials of my Ministry to ensure they meet the specific needs of the Sierra Leonean population. They provide step-by-step guidance for each learning outcome, using a range of recognised techniques to deliver the best teaching.

I call on all teachers and heads of schools across the country to make best use of these materials. We are supporting our teachers through a detailed training programme designed specifically for these new plans. It is really important that these Lesson Plans are used, together with any other materials you may have.

This is just the start of education transformation in Sierra Leone. I am committed to continue to strive for the changes that will make our country stronger.

I want to thank our partners for their continued support. Finally, I also want to thank you – the teachers of our country – for your hard work in securing our future.

Dr. Minkailu Bah

Minister of Education, Science and Technology

Introduction to the Lesson Plan Manual

These lesson plans are based on the National Curriculum and meet the requirements established by the Ministry of Education, Science and Technology.

- 1  The lesson plans will not take the whole term, so use spare time to review material or prepare for exams
- 2  Teachers can use other textbooks alongside or instead of these lesson plans.
- 3  Read the lesson plan before you start the lesson. Look ahead to the next lesson, and see if you need to tell pupils to bring materials for next time.
- 4  Make sure you understand the learning outcomes, and have teaching aids and other preparation ready – each lesson plan shows these using the symbols on the right.
- 5  Quickly review what you taught last time before starting each lesson.
- 6  Follow the suggested time allocations for each part of the lesson. If time permits, extend practice with additional work.
- 7  Lesson plans have a mix of activities for the whole class and for individuals or in pairs.
- 8  Use the board and other visual aids as you teach.
- 9  Interact with all students in the class – including the quiet ones.
- 10  Congratulate pupils when they get questions right! Offer solutions when they don't, and thank them for trying.

TEXT – Literacy in Sierra Leone

When people can read and write in any language, they are literate. The government or organisations like UNICEF count how many people in a country are literate. The total literacy rate in Sierra Leone is around 44%. More men are literate than women. The government and many organisations are trying to help more people to read and write. They give books to schools for children and help their parents learn how to teach them at home.

There are many reasons for low literacy in the world. Sometimes families want their children to work instead of studying. Sometimes a family is poor and they need the children to work to pay for food and housing. Schools can be far from home and children can't walk there. War can also stop children going to school. There are often many children in one classroom and it is difficult to learn.

Illiteracy causes many problems. People who can't read and write find it difficult to get good jobs. People can't read medicines they are given at the doctor and so may be afraid to take them. People can't find out information from newspapers and so they don't know what is happening in their country. Parents who can't read and write find it difficult to help their children study.

TEXT

In most countries children start attending school at four years old but in some they start at seven. The ratio of children to teacher is different too. In some countries the ratio is one teacher to fifteen pupils and in some the ratio is one teacher to a hundred. Different schools have different equipment: some schools have desks and chairs, some have benches and in some countries pupils sit on carpets on the floor. Of course knowledge is the most important thing pupils want to get from schools. They want to learn about many things in many different topics. Children can gather information from many different places, just by listening to people or the radio, or reading newspapers, but school is where they learn the most.

ESSAY

When people talk about their favourite place they often say somewhere far away. A city they visited or somewhere they went on a trip. My favourite place is very close. It is my home.

I like my house because my family lives there. I live with my mother, my father, my two brothers and my grandmother. It is always very noisy because my family does a lot of things. My father listens to the radio. My mother sings in the morning. My brothers play, or sometimes fight. Only my grandmother is quiet. She sits smiling at everyone.

My home is very pretty and comfortable too. We have nice pictures on the wall and colourful material on the furniture. We have a table cloth with fruit on it in the middle of the room and sometimes there are flowers on it. It is very nice to sit there on a hot day because it is cool inside my home.

I don't need to go far away to be happy. I have everything I need at home.

Saturday, 29th October, 2016

Tonight I have to practice my singing with the school choir. We will perform next week at the school drama and arts show. I am really excited. I think I have a good voice but I won't tell anyone else that; it's a secret.

LETTER FROM CAIRO

Dear Mohamed,

I hope you are well. I am fine and school is good. In your last letter you asked me to tell you about my city and my free time.

I like my city because there are lots of things to see and do. It is very lively because there are lots of shops, restaurants, offices. It has a very large population. There are so many people living and working in Cairo. There are so many cars and buses that often it is difficult to get from one place in the city to another because there are traffic jams.

I am keen on playing and watching football. My favourite team is the Brazilian football team because I think they are the best team in the world. I also like hanging out with my friends. We go to the park or to each other's homes.

I must go now as it is my bedtime. Please write when you have time.

With best wishes,

Abdul

TRADITIONAL STORY: THE UGLY DUCKLING

Mother Duck lived near a lake. She had five small eggs and one large egg in her nest of grass and reeds. One day, the five small eggs cracked. Five, beautiful yellow ducklings hatched.

Then the large egg cracked open. One big, ugly duckling hatched. Mother Duck thought it was very strange this duckling was so ugly because all the other ducklings were so beautiful.

None of the ugly duckling's brothers or sisters wanted to play with him. Everyone thought he was too ugly to play with.

The ugly duckling was upset and lonely. So, he decided to look for some friends. Nobody wanted to be his friend and play with him. Not the pig, sheep, not the cow, not the horse. They all told him to go away.

It started to get cold. He did not want to go back to the lake, so the ugly duckling found an empty barn and stayed there. He was cold, upset and lonely. He stayed in the barn all winter.

Then spring arrived. The ugly duckling left the barn and went back to the lake. He was very thirsty and put his beak into the fresh, cool water. He saw a beautiful, white bird in the lake. He did not know who it was.

Suddenly, another beautiful, white bird appeared. He told the ugly duckling that he could see himself in the lake. He told him he was not an ugly duckling any longer. He was a beautiful swan.
